

Regulatory Authorities on Glyphosate: No Evidence of Carcinogenicity

U.S. Environmental Protection Agency

"EPA has concluded that glyphosate does not pose a cancer risk to humans." 2013 Federal Register Notice (FR 25396, Vol. 78, No. 84, May 1, 2013).

U.S. Environmental Protection Agency

"Several chronic toxicity/carcinogenicity studies...resulted in no effects based on the parameters examined, or resulted in findings that glyphosate was not carcinogenic in the study" and "Glyphosate does not cause mutations." U.S. EPA. (1993) EPA: Glyphosate. EPA-738-F-93-011. U.S. Environmental Protection Agency, Washington, D.C.

German Federal Institute for Risk Assessment (BfR)

"In epidemiological studies in humans, there was no evidence of carcinogenicity and there were no effects on fertility, reproduction and development of neurotoxicity that might be attributed to glyphosate." Glyphosate Renewal Assessment Report, Germany, Rapporteur Member State for the European Renewal of Approval for Glyphosate (2014)

Australian Pesticides and Veterinary Medicines Authority

"The APVMA currently has no data before it suggesting that glyphosate products registered in Australia and used according to label instructions present any unacceptable risks to human health, the environment and trade. ... The weight and strength of evidence shows that glyphosate is not genotoxic, carcinogenic or neurotoxic." Australian Government, Australian Pesticides and Veterinary Medicines Authority (2013)
